

HEPA LEVEL FILTRATION™

HEPA Level Filtration

The most powerful backpack vacuum on the market is now available with HEPA Level Filtration. The Super CoachVac® HEPA and Super QuarterVac® HEPA are formidable tools for battling poor indoor air quality. They are ideal for vacuuming high square-footage facilities and high-traffic area that requires extreme power and suction when deep cleaning any surface.

HEPA LEVEL FILTRATION™

Warranty*

3 years on parts, labor and motor. Lifetime on body.

*see owner's manual for complete warranty details

ERGONOMIC

Advantages

Now with HEPA, the most powerful backpack vacuums on the market have 6 or 10 quart filter capacity designed to handle high square-footage areas that require the utmost cleanliness.

Vastly exceeds all industry regulation testing standards set by the Carpet & Rug Institute and the requirements of the U.S. Green Building Council's LEED rating system on performance and filtration.

With a smaller profile, the Super QuarterVac HEPA is versatile enough for any sized cleaning professional.

Utilizing our most powerful motor, users are able to clean more with less down time.

HEPA filter works in concert with ProTeam's advanced Four Level Filtration system (including organically treated Intercept Micro Filters) to capture 99.97% of airborne particles .3 micron or larger which meets HEPA filtration levels.

New waist and shoulder straps distribute weight evenly for maximum comfort and quick adjustment.

Redesigned ergonomic backplate with switch cord pocket, cord control and integrated tool belt to keep accessory tools within your grasp.

Includes a thermal protector shut-off switch that prevents the motor from overheating due to a full filter or obstruction within the vacuum.
